

# Confined Space Entry: High Risk Refresher (CSC03R)

This course is about refreshing and reassessing the previously attained knowledge of working in confined space environments which have non-standard entries and which, in consequence, makes rescue difficult. It is likely that a hazard will be present at some time during the entry.

Entry may involve complex entry procedures and there will be work-specific controls and rescue arrangements. It will entail the use of self-contained open circuit breathing apparatus, specialist detection equipment and resuscitation equipment.

It will require the presence of personnel who have designated responsibilities for controlling the entry and dealing with emergencies.

## Course Contents

- Definition of a confined space (HSE, C&G, Water UK NC1-NC4 classifications)
- Specified risks
- Duties under the regulations, preventing the need for entry
- Risk assessment and hazard identification
- Atmospheric hazards and gases
- Principles and use of gas detectors
- Safe systems of work and permits to work
- Roles, responsibilities, and entry controller duties
- Inspection and use of escape sets and working breathing apparatus
- Pre-use checks of equipment including correct donning and adjustment of harnesses
- Inspection and applications of tripods, winches, and fall arrest equipment

Important: Candidates are only eligible for the refresher course for a maximum of 6 months after expiration of prior certification.

## Learning Outcomes

- Prepare to work safely in high risk confined spaces
- Enter and exit high risk confined spaces safely
- Prepare and use self-contained open circuit breathing apparatus in accordance with the manufacturer's instructions
- Use equipment and tools safely, and in accordance with the manufacturer's instructions
- Follow procedures and work safely
- Deal with emergencies
- Use appropriate behaviour when working in high risk confined spaces
- Understand legislation governing working in high risk confined spaces
- Apply appropriate industry specific knowledge for working in high risk confined spaces

## Course Assessment

- Direct observation of an entry into a low risk confined space
- Written test in line with the National Occupational Standards
